

## Mobile App Case Study

# Anti Theft Alarm

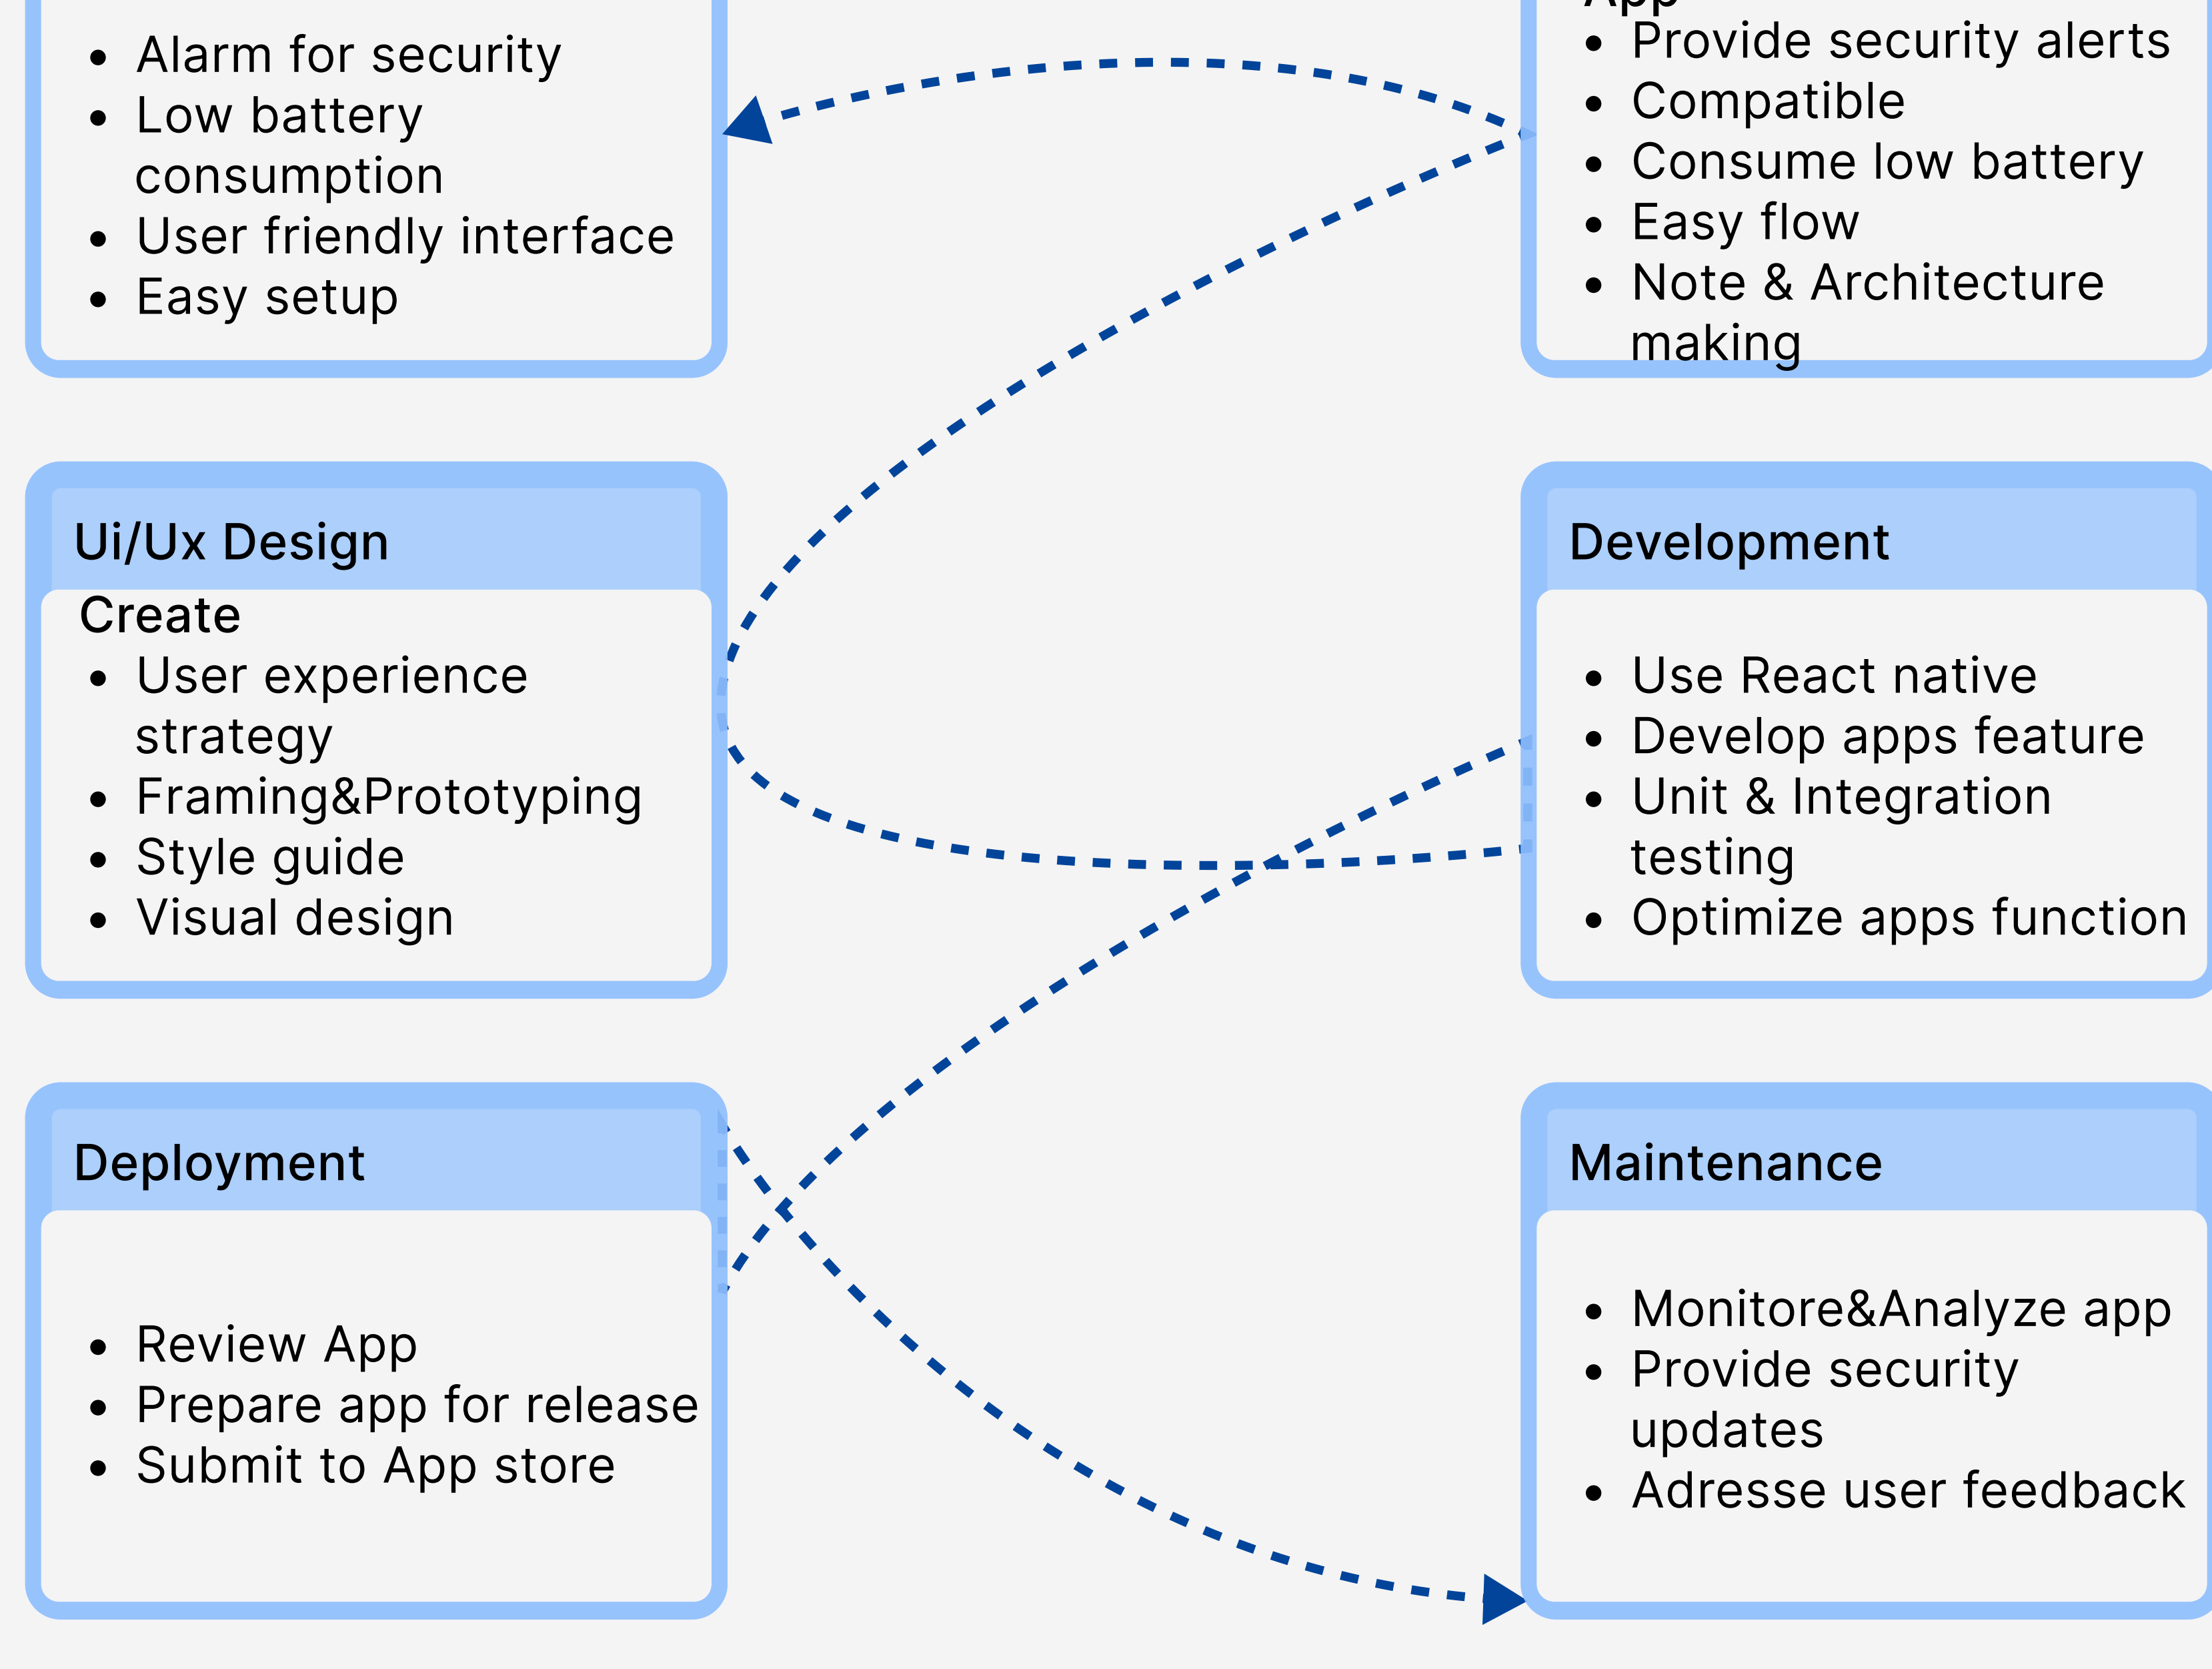

Stay protected with confidence  
by real time alerts for your safety

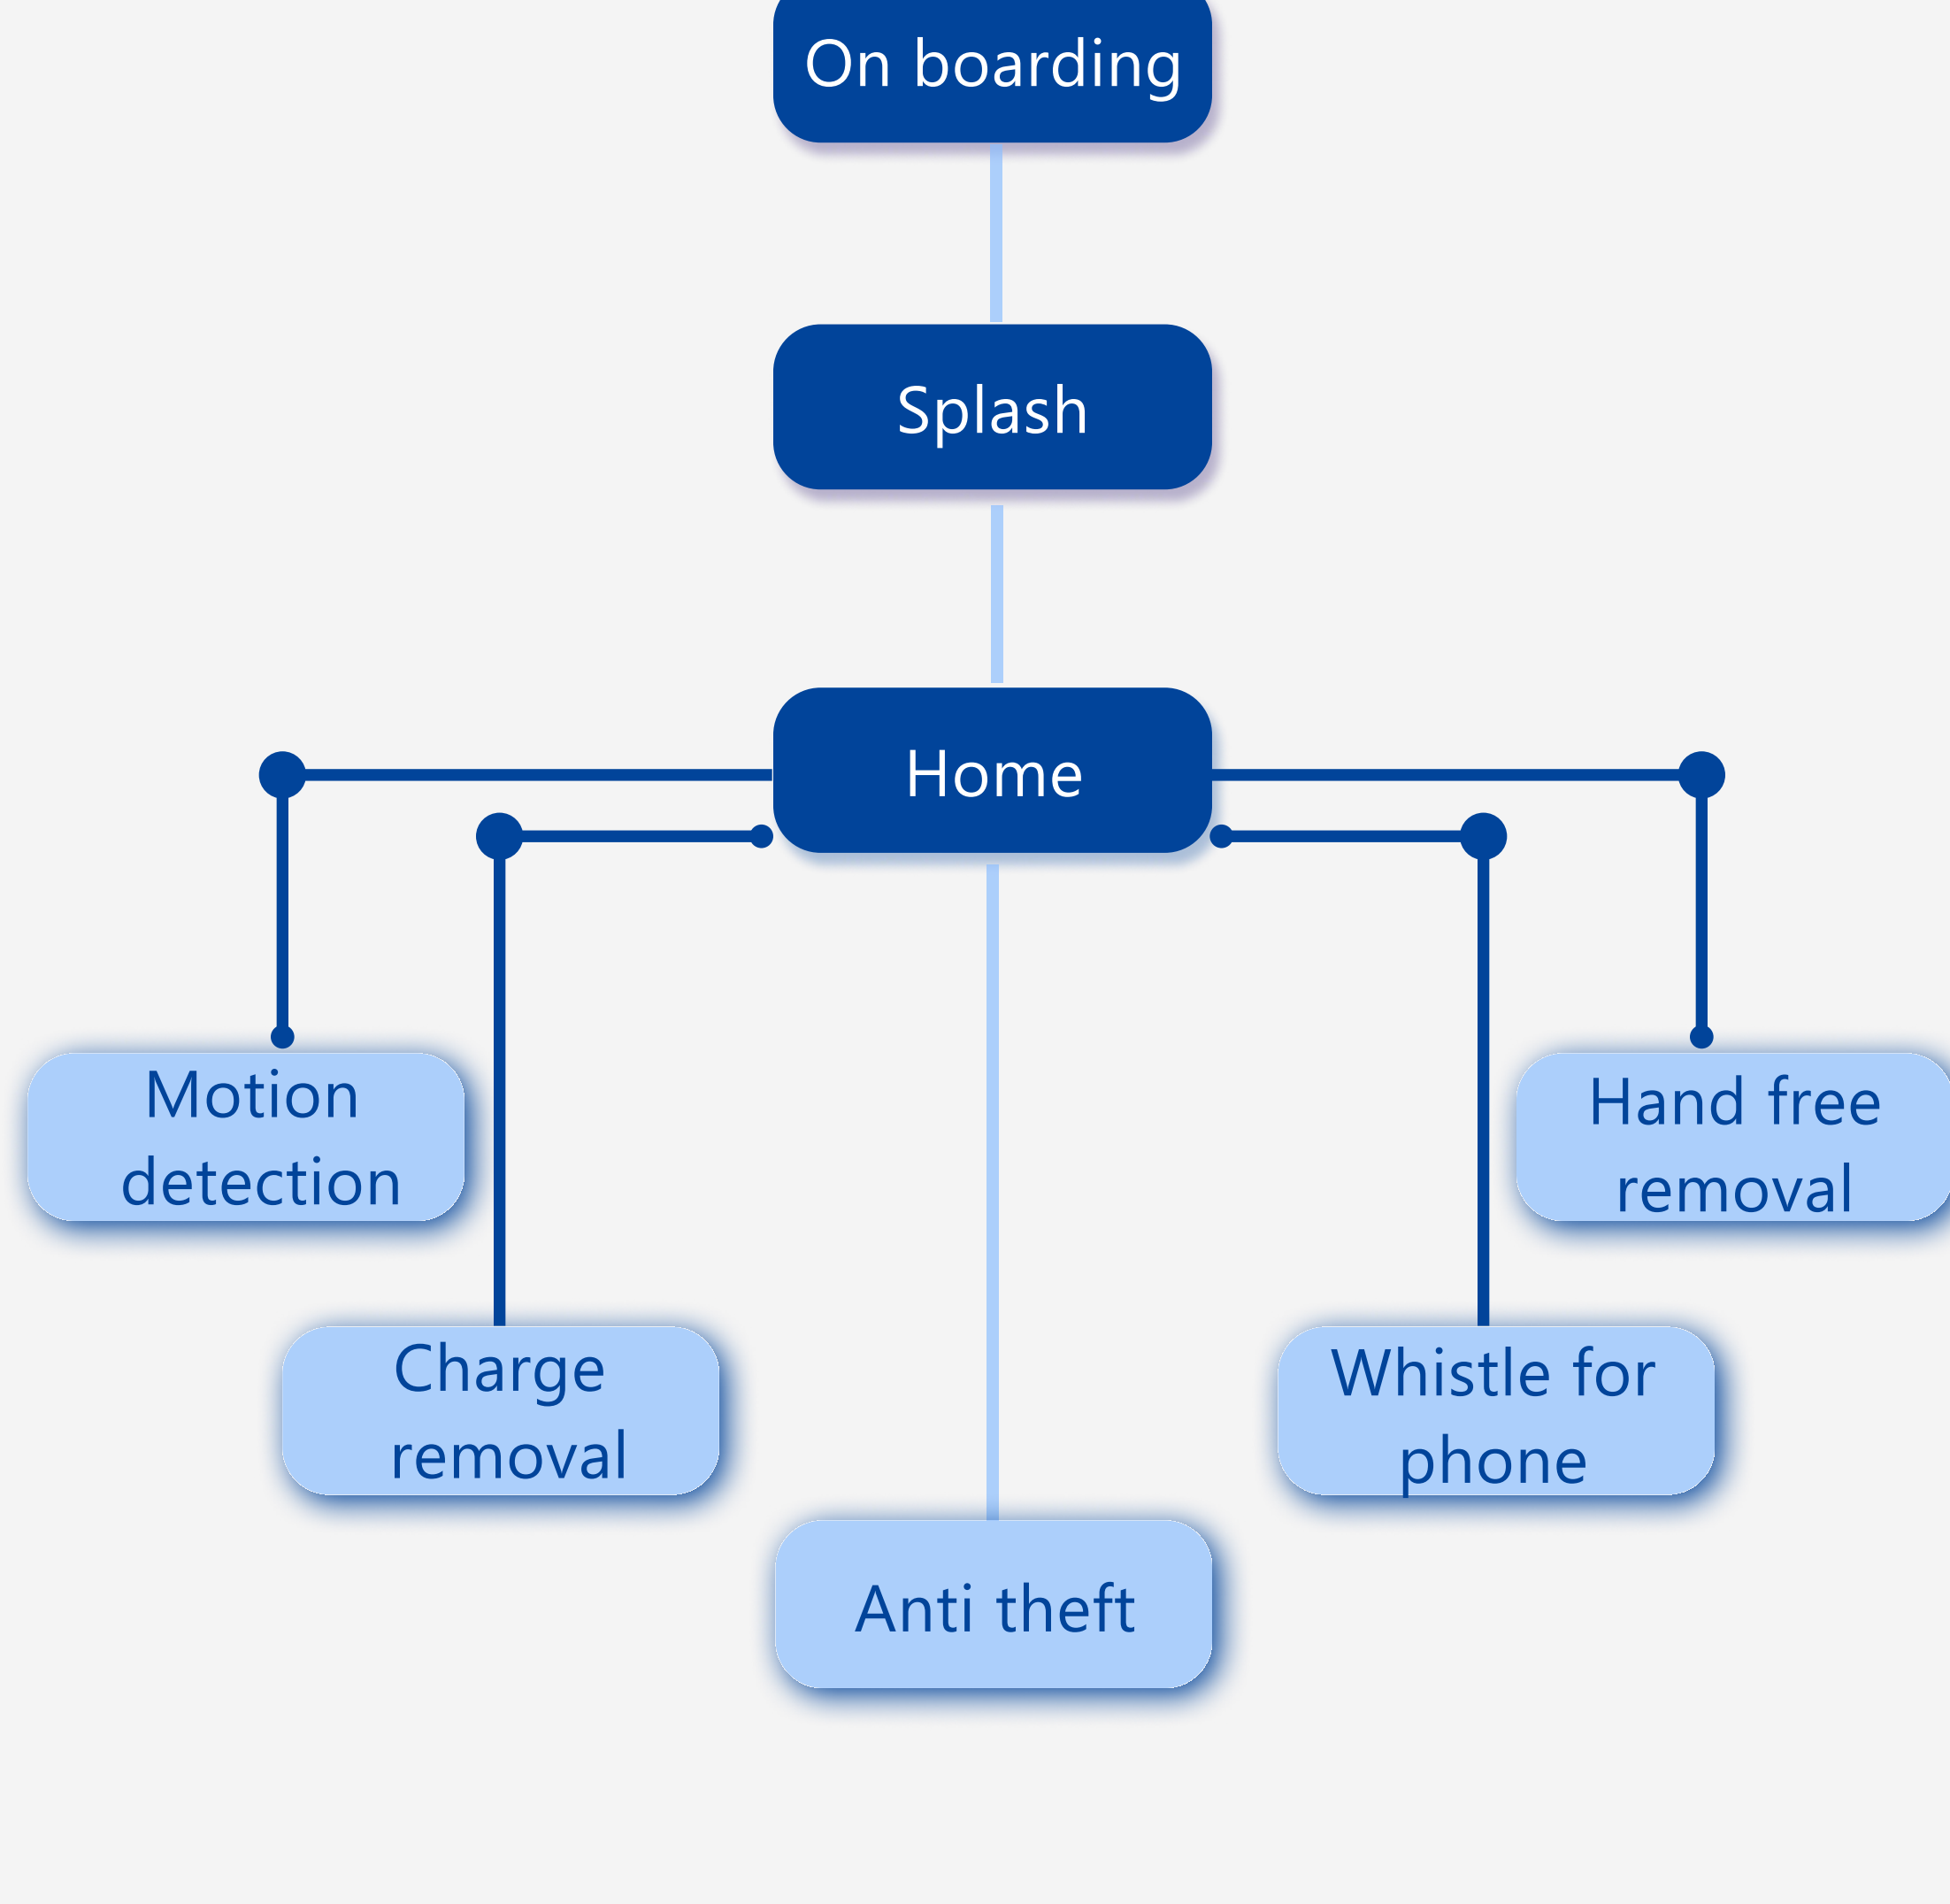

## Project Overview

The Anti-Theft Alarm App is a mobile application designed to protect users' devices from theft. The app uses anti pocket, hand free removal, charge removal, motion detection alert to detect suspicious activity and trigger an alarm. The project aimed to create a user-friendly, efficient, and effective solution to deter device theft.

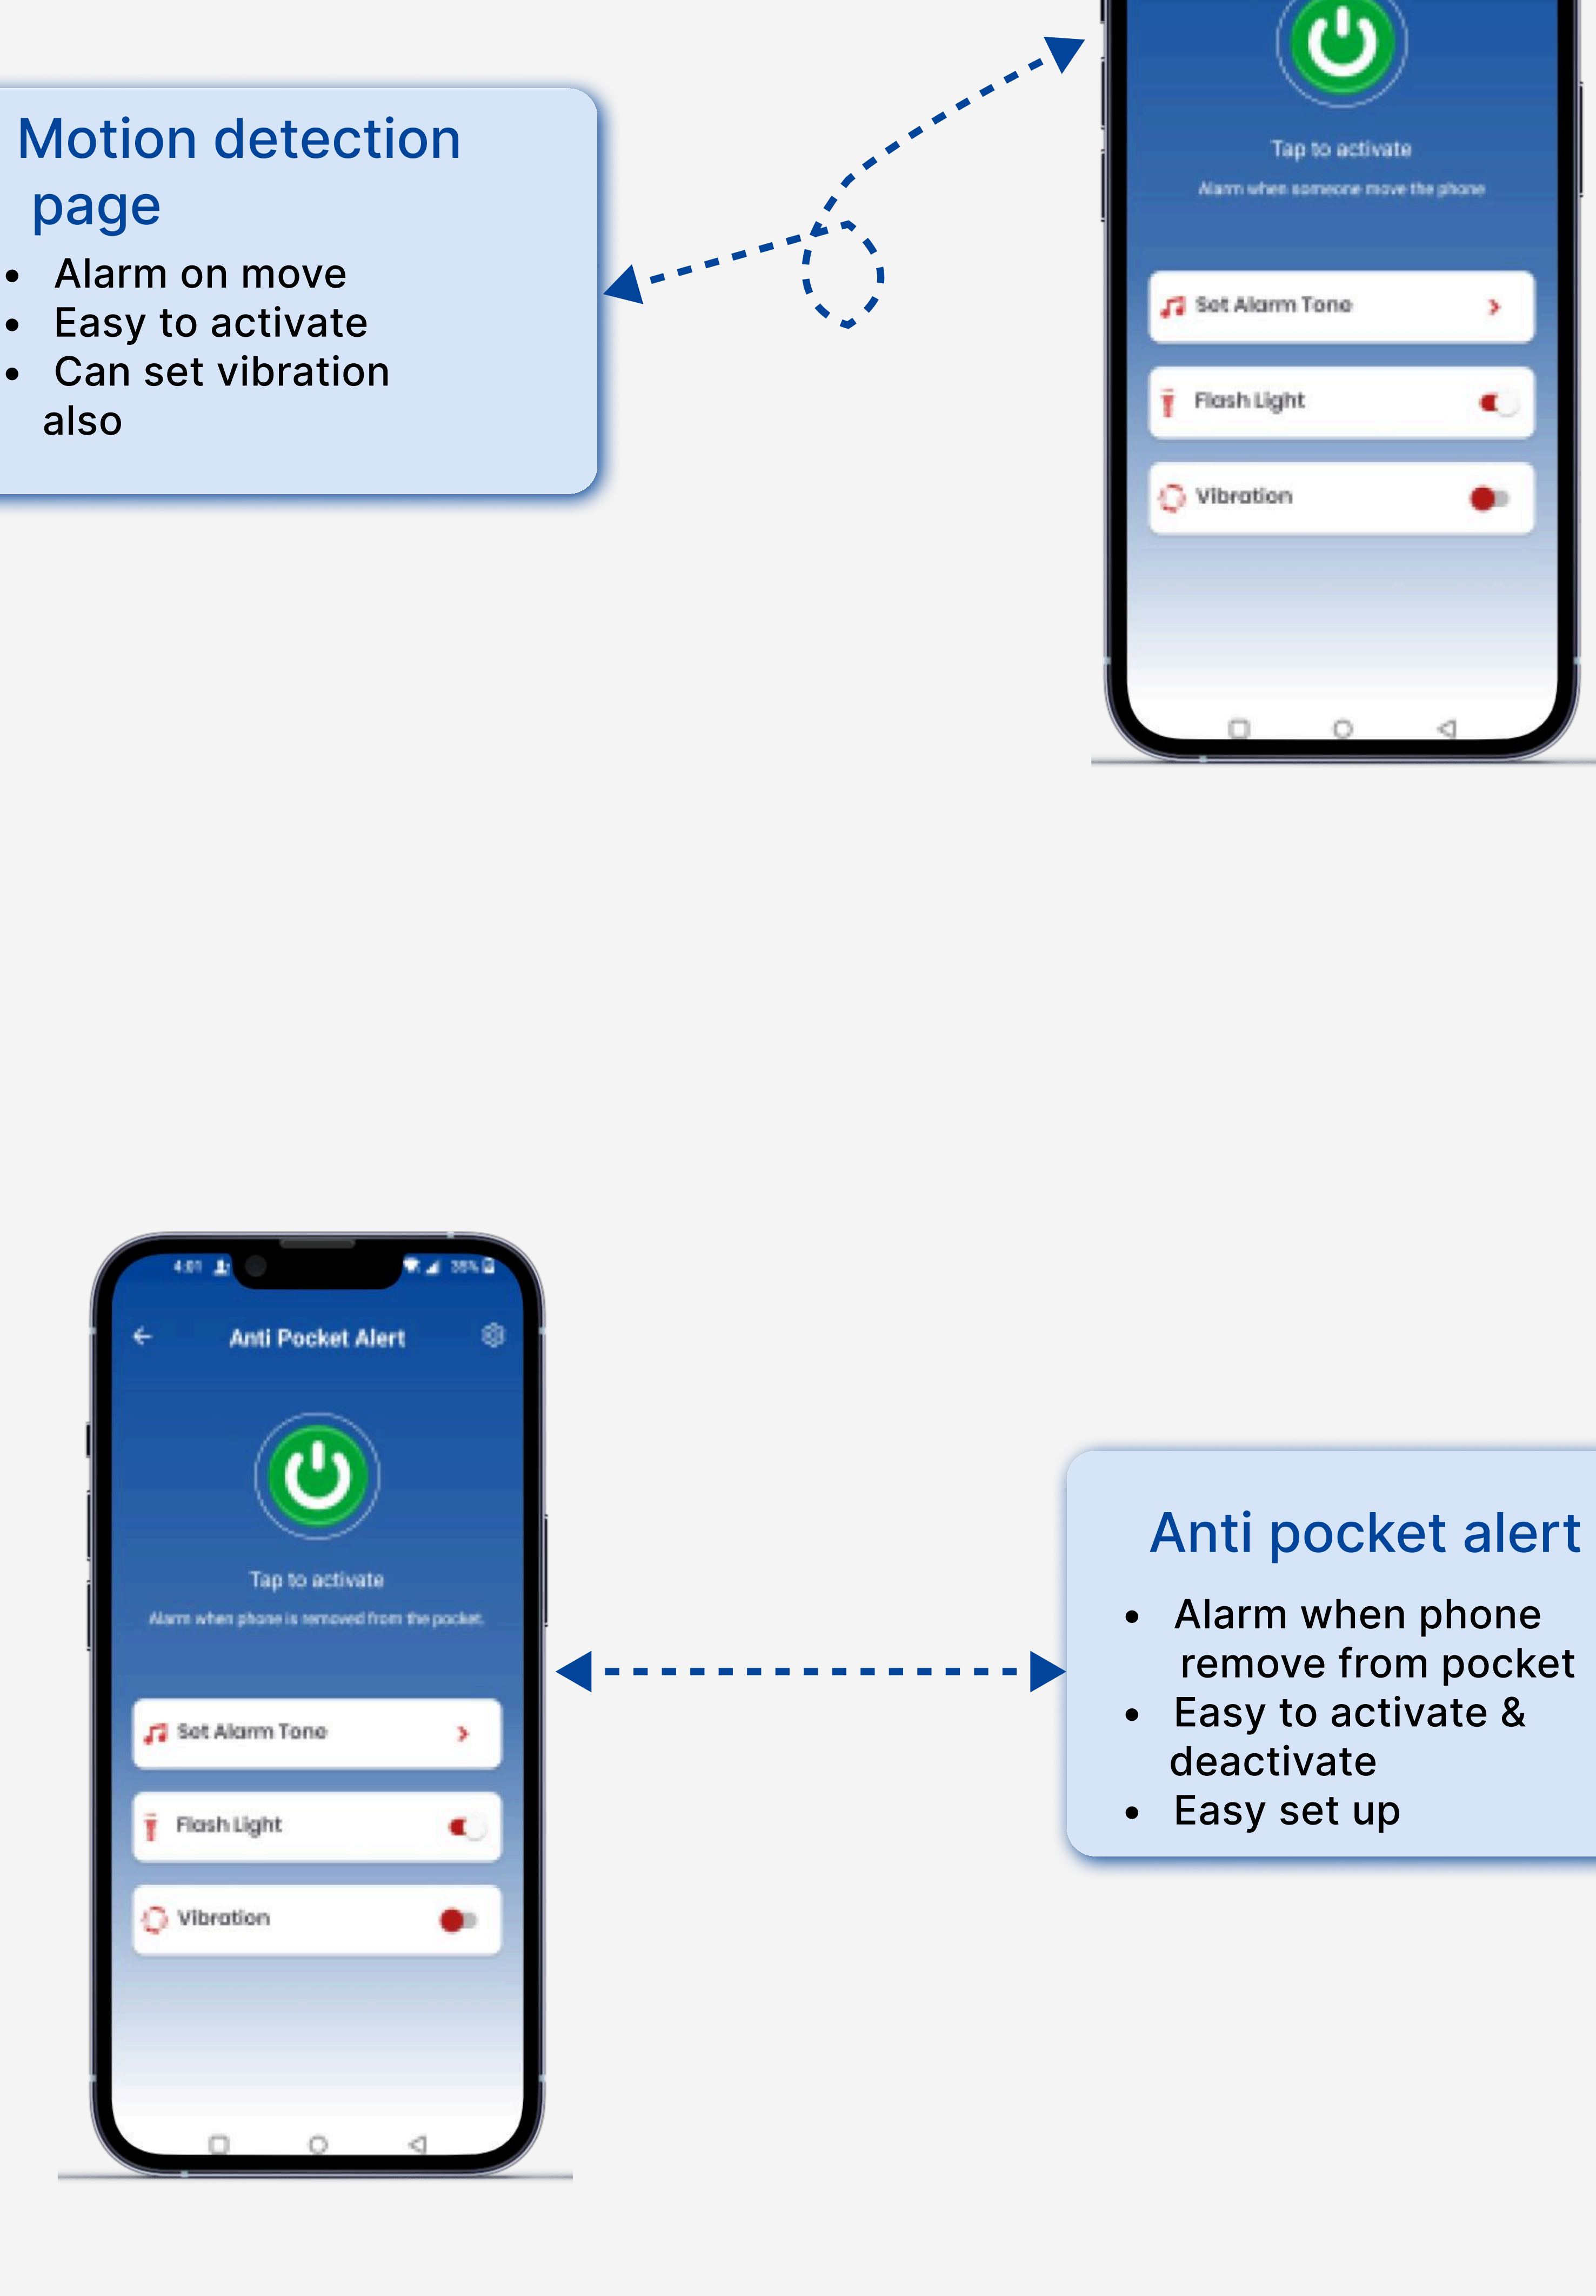

## Process

## User flow

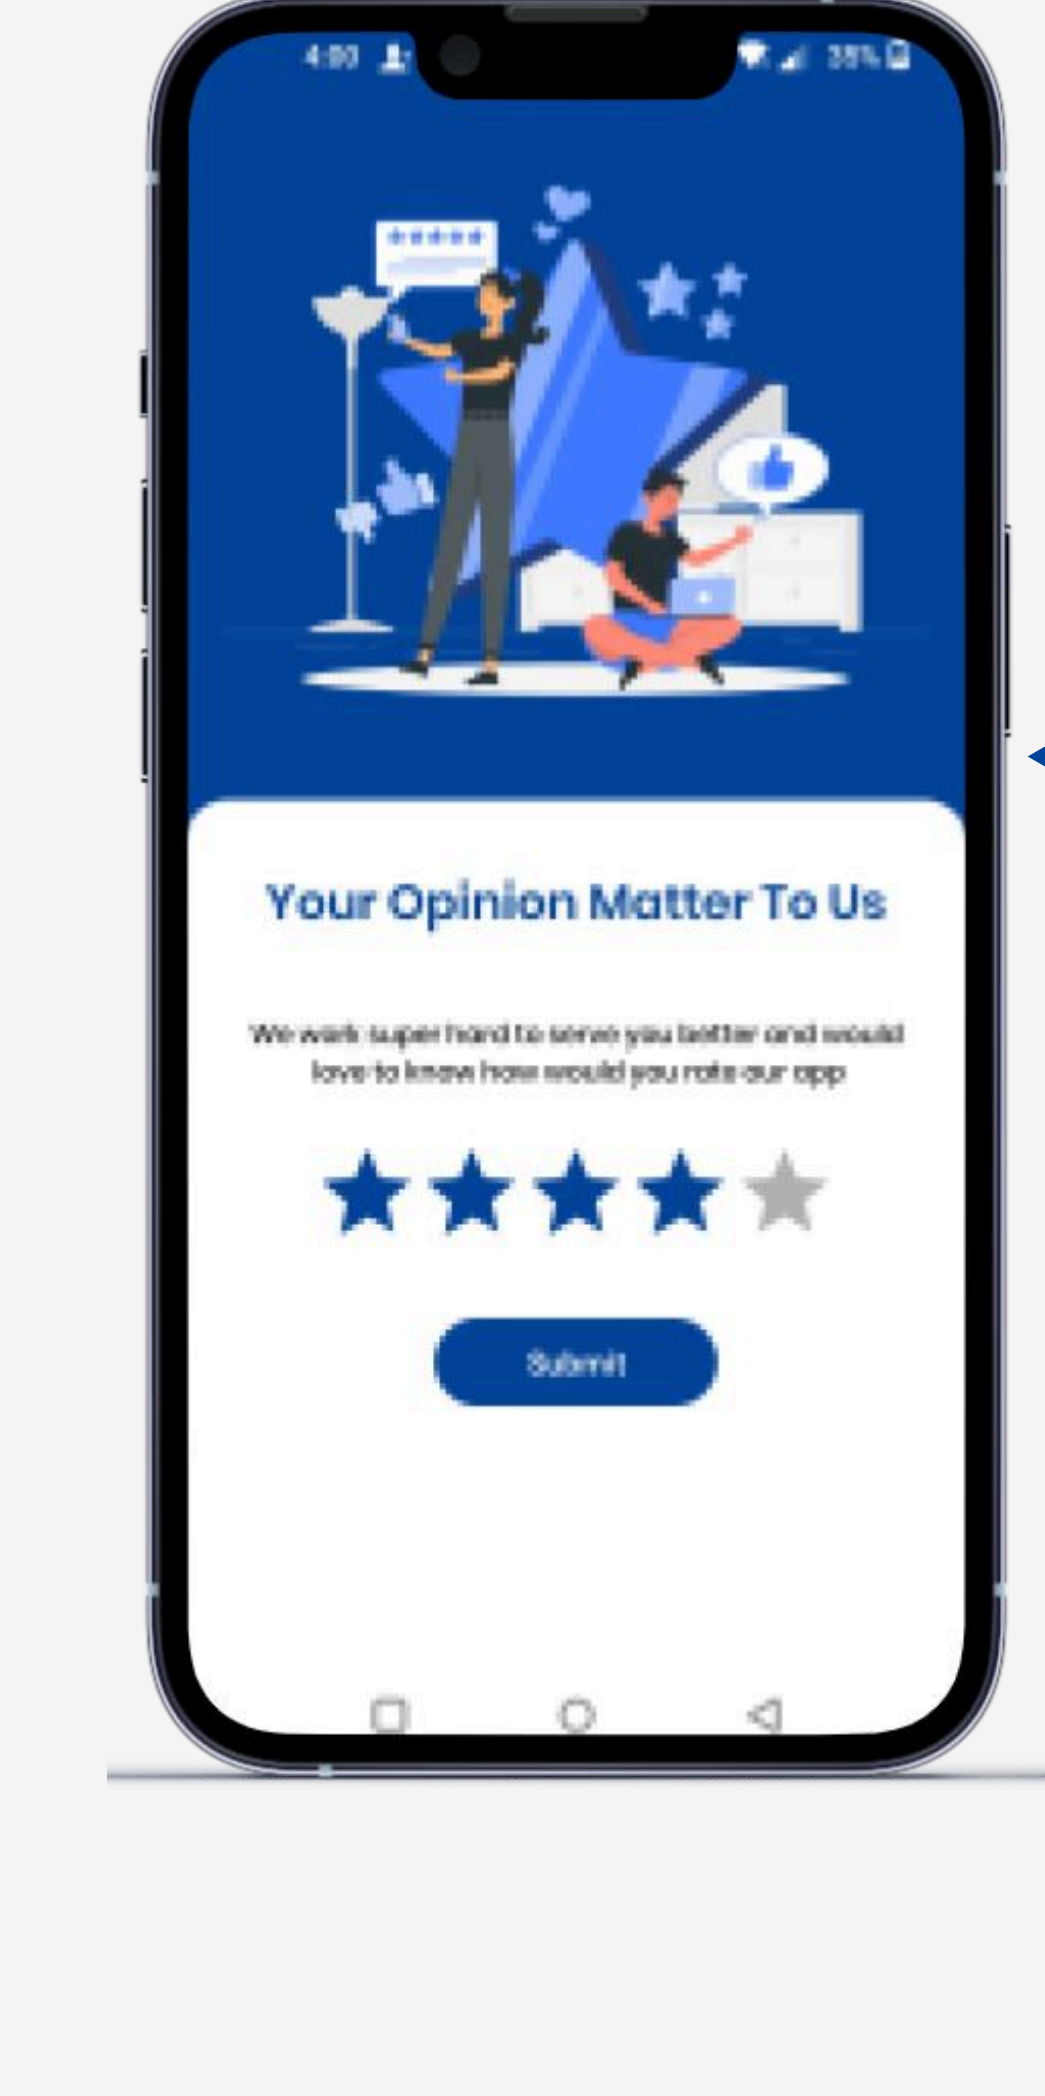

## Mobile app
